

PROBLEM–SOLUTION FIT

EDUGENIE – AI-POWERED LEARNING ASSISTANT

PROBLEM

The project documentation identifies several recurring learning-support needs: answering academic questions, simplifying difficult concepts, creating quizzes, shortening long study material, and providing a learning sequence.

SOLUTION

EduGenie combines these functions in a single web application with separate modules connected through FastAPI.

FIT

1. Academic question → Q&A module.
2. Difficult concept → Concept Explanation module.
3. Need for practice → Quiz module.
4. Long material → Summary module.
5. Need for learning order → Learning Path module.

VALUE

The architecture maps each documented learning scenario to a dedicated function while keeping all functions accessible from one interface.
