

EDUGENIE – AI-POWERED LEARNING ASSISTANT

AIM

To develop EduGenie, an AI-powered learning assistant that brings question answering, concept explanation, quiz generation, text summarization, and structured learning-path generation into one web application.

The application is designed to provide academic assistance through a FastAPI backend, an HTML/CSS interface, Gemini 3.5 Flash for cloud-based generative functions, and LaMini-Flan-T5-783M for local concept explanation.
