

EDUGENIE – AI-POWERED LEARNING ASSISTANT

ALGORITHM

- STEP 1: Start the EduGenie FastAPI application.
- STEP 2: Load the application configuration.
- STEP 3: Display the EduGenie web interface.
- STEP 4: Allow the learner to select a learning function.
- STEP 5: Collect the required user input.
- STEP 6: Send the request to the FastAPI backend.
- STEP 7: Identify the selected learning module.
- STEP 8: For Q&A, send the question to Gemini 3.5 Flash.
- STEP 9: For concept explanation, send the topic to LaMini-Flan-T5-783M.
- STEP 10: For quiz generation, send the topic/material to Gemini 3.5 Flash.
- STEP 11: For summarization, send the educational text to Gemini 3.5 Flash.
- STEP 12: For learning path generation, send the subject to Gemini 3.5 Flash.
- STEP 13: Receive the generated result.
- STEP 14: Return the result through the backend.
- STEP 15: Display the result in the web interface.
- STEP 16: Allow the learner to use another feature.
- STEP 17: End when the application is stopped.
